

# PURLIFT

## POSITIVE DRIVE, VERTICAL LIFT CONVEYOR - NOT JUST FOR DOUGH

The PURLift positive drive vertical lift conveyor fits in tight spaces where you need to elevate your food processing line. Its positive drive system and self-tracking belt keep your product and operation moving. Sanitation is more efficient with caster footing to move on and off the line quickly, and a pneumatic belt tensioning system doubles as a quick release take up.

Historically known as a dough elevator, we've optimized the PURLift for a range of manipulative, consistent products such as peanut butter, meat, and even green beans.

- Lift product up to 90 degrees vertical between double "sandwiched" conveyor belts
- Automatic infeed keeps product moving without delay
- Positive drive, self-tracking belt system
- Pneumatic belt tensioning
- Food-grade sanitary design with open frame and belt lifts for tool-less washdowns
